Triage SLAs & Priority Rules	×	×	✓ Included	✓ Included

 **Why Linear's Free Tier Works Exceptionally Well for App Studios**

- **Soft 250 Active Task Ceiling:** Unlike tools that cap total historical tasks, Linear only limits *active* (unresolved) issues to 250. When you resolve or close a bug/feature, it archives and frees up a slot.
- **No Feature Paywalls on Core Workflow:** Linear includes Roadmaps, Cycles (sprints), Inbound Email Triage, and GitHub PR linking directly on the **Free plan** without hidden "use limits" or daily caps.
- **When to Upgrade:** You only need to upgrade to **Basic (\$8/mo)** if your team keeps more than 250 tasks open simultaneously or requires private project permissions for external freelancers.
